SELECTION OF JING TEAS

For tea drinkers around the world, the connection to the origins of tea—how, where, and by whom it is grown—has largely faded. However, in countries where this bond is still strong, the unique places and people behind distinctive, flavourful teas are celebrated. It became evident that tea could be more than just a commodity tucked away in a kitchen cupboard. This insight led to the creation of JING, a brand dedicated to sharing the full, rich experience of tea in all its glory.
